MINIATURE GEARS DOWN TO MODULE 0.10

The increasing miniaturisation of electronic components has led to the parallel demand for smaller engineering components such as micro gears for micro assembly, electronic and medical engineering as well as model making.

The Japanese manufacturer, KHK, produces one of the most extensive ranges of stock gear types and variants and has naturally developed its size range down as well as up. And its latest introduction is a new series of standard micro spur gears from module 0.40 down to just 0.10.

These steel gears are manufactured to JGMA 3 precision grade and are available in three design variants to suit the application. If the standard miniature range cannot meet the need, custom micro gears can also be specified.

All KHK gears, stock and custom, are available via the manufacturer's European master distributor R. A. Rodriguez based in Letchworth, Hertfordshire.

-ENDS-

R. A. Rodriguez has over 40 years experience in the supply of precision components to manufacturing industry in the UK, Ireland and Scandinavia. This ISO 9001:2000 company acts as factory representative for a number of the world's leading component designers and manufacturers. Its product programme falls into five divisions – bearings, linear motion, aerospace, conveyor equipment, gears and associated products. R. A. Rodriguez bearing products include the world-renowned Kaydon Reali-Slim® and Ultra-Slim® designs. In the linear motion field, R. A. Rodriguez supplies a range of solutions from components and sub-assemblies through to complete turnkey systems.
